

# Tank Pressure Regulating Blower

This package comes as a prefabricated unit with, a skid mounted motorized-blower and electronic control system. Our emissions control devices come in a wide range of standard models, or we are able to design and manufacture custom units to your exact specifications.

## Reduces Leaks

Reduces leaks from thief hatches without generating a vacuum in your tanks

## Constant Pressure

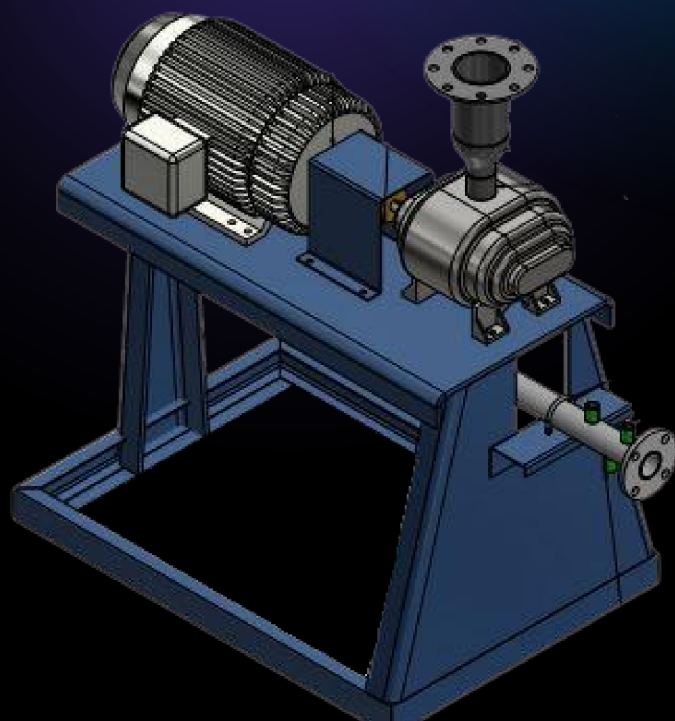

Designed to hold tank pressure at a user defined level & adjustable variable speed drive

## PLC Touch Screen

PLC touch screen (HMI) with data logging making it easy to use, and it provides a range of features to reduce backpressure

## Cost Effective

A cost-effective solution for new sites or retrofitting existing sites with options for cold weather operation

## Specifications

**Flow Range:** 5MSCF to 500MSCFD

**Outlet Pressure Range:** 1 to 10 psig

**Tank Pressure Regulated:** 2 to 10 oz/in<sup>2</sup>
